WILDLIFE AND OTHER “CRITTERS”

Some of our guests have never vacationed in the woods, so we thought we would share some insights about the critters you may encounter during your stay.

You may see rabbits, raccoons, possums, squirrels, deer, bears, snakes, etc. Raccoons may come onto the patio at night, **so please be sure to keep your trash can lids secured. Please do not engage with any of the wildlife, and do not shoot the deer or any critters you encounter.** For your protection, take caution against poison ivy, poison oak and poisonous snakes, such as copperheads and rattlesnakes. Repellant for poison ivy and bug repellant are suggested. Chiggers are a potential nuisance in the woods, so it's a good idea to stay away from tall grass in the warmer months.

Due to constant weather fluctuations, we typically experience insects at different times of the year, and some will be around the house since we are in the wilderness. However, rapid changes in temperature from cold/cool back to hot/humid may cause them to occasionally swarm around the houses. If doors and windows are left open, they will find their way inside! In the hottest part of the year, ants may come inside looking for water in kitchens and bathrooms. Also, you might hear insects (and frogs) making their typical sounds during the night. Our houses are set up on an extermination program through a professional pest control service and are checked regularly.

When nights begin to cool, wasps try to find a warm place to stay. This may occur in the fall and continue until weather gets warm again in the spring. You may see them beginning in the late afternoon as the sun goes down. **It does not mean there is a nest!** Wasps go dormant when the house temperature is cooler. PLEASE do not spray windows with wasp spray. Wasps are a pesky part of nature, and if you see a nest, let us know and we will take care of it. If you do not see a nest, please know they are searching for a warm place to stay until warmer weather – we have no control over them!

Due to the natural habitation of the forest, **no refunds or compensation will be given for any problems resulting from pests inside or outside the house.** Do not feed animals you may see around the house nor permit them to enter the house. Do not allow children to play with, pet or feed stray animals. We are not responsible for any wildlife or animal encounters of any kind or for medical bills resulting from injuries resulting from encounters with wildlife or stray animals

We just like to ensure our guests understand that this is the great outdoors, so nature is to be expected. We hope you enjoy your stay and that the insects don't BUG you too much!

WEATHER AND ENVIRONMENTAL CONDITIONS

We are not able to give refunds due to inclement weather and/or early departure. We will rebook a reservation if National Weather Service or State Weather Services issues advisories about all road closures that do not allow you to travel between your point of departure and our properties. Prescribed or controlled burns may be conducted in the area by the US Forest Service. C21PRE is not able to provide refunds or cancellations due to environmental conditions from prescribed or controlled burns. Guests are encouraged to purchase travel insurance.
